Geotechnical Characteristics of Soils and Rocks of India Jan 21 2020 This book presents mainly the geotechnical details of geomaterials (soils and rocks) found in all the 36 states and union territories of India. There are 37 chapters in this book. Chapter 1 provides an overview of geomaterials, focusing on their engineering properties as determined based on the project site investigations and laboratory/field tests; this will help readers understand the technical details explained throughout the book, with each chapter dealing with geomaterials of one state/union territory only. Each chapter, contributed by a team of authors, follows a common template with the following sections: introduction, major types of soils and rocks, properties of soils and rocks, use of soils and rocks as construction materials, foundation and other geotechnical structures, other geomaterials, natural hazards, case studies and field tests, geoenvironmental impact on soils and rocks, concluding remarks and references. All the chapters cover highly practical information and technical data for application in ground infrastructure projects, including foundations of

structures (buildings, towers, tanks, machines and so on), highway, railway and airport pavements, embankments, retaining structures/walls, dams, reservoirs, canals and ponds, and landfills and tunnels. These details are also highly useful for professionals dealing with mining, oil and gas projects and agricultural and aquacultural engineering projects. Although this book covers the Indian ground characteristics, the information provided can be helpful in some suitable forms to the professionals of other countries having similar ground conditions and applications.

Envisioning the Future of Online Learning Sep 28 2020 This

book shares insights into the various ways technology can be used for educational purposes, utilizing an approach suitable for both novice and advanced practitioners in this niche area. It features selected papers presented at the International Conference on e-Learning 2015 (ICeL 2015), where professionals discussed how technology can not only serve as a tool in the classroom, but as the classroom itself. As the title "Envisioning the Future of Online Learning" suggests, this book showcases current best practices in the field of e-learning, where technology has been leveraged to re-engineer the landscape of education, particularly in the context of Malaysia.

Cyber law in Bangladesh May 25 2020 Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical guide to cyber law the law affecting information and communication technology (ICT) in Bangladesh covers

every aspect of the subject, including intellectual property rights in the ICT sector, relevant competition rules, drafting and negotiating ICT-related contracts, electronic transactions, privacy issues, and computer crime. Lawyers who handle transnational matters will appreciate the detailed explanation of specific characteristics of practice and procedure. Following a general introduction, the book assembles its information and guidance in seven main areas of practice: the regulatory framework of the electronic communications market; software protection, legal protection of databases or chips, and other intellectual property matters; contracts with regard to software licensing and network services, with special attention to case law in this area; rules with regard to electronic evidence, regulation of electronic signatures, electronic banking, and electronic commerce; specific laws and regulations with respect to the liability of network operators and service providers and related product liability; protection of individual persons in the context of the processing of personal data and confidentiality; and the application of substantive criminal law in the area of ICT. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for business and legal professionals alike. Lawyers representing parties with interests in Bangladesh will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative law in this relatively new and challenging field.

Investing for Development Sep 21 2022 CDC Group Plc, formerly the Commonwealth Development Corporation, is the United Kingdom's Development Finance Institution. Wholly

owned by the Department for International Development (DFID), it aims to help reduce poverty by supporting private sector development. CDC invests equity in private enterprises in developing countries in order to demonstrate to other investors that it is possible to make money in such countries, while at the same time creating sustainable jobs, paying taxes and following good social and environmental policies. DFID restructured CDC in 2004 in order to invest indirectly, through private fund managers. CDC invests largely in sub-Saharan Africa and South Asian enterprises in sectors as diverse as retail, financial, agricultural and manufacturing. Since 2004, CDC has grown rapidly, more than doubling the value of its assets to £2.7 billion by mid-2008. DFID's oversight of certain elements of business efficiency needs to be improved. CDC invests over 70 per cent of its resources in poor countries, but has limited influence where its fund managers invest. Only 4 per cent of its resources are invested in small and medium enterprises, which suffer a shortage of finance. For DFID, financial performance is the principal indicator of CDC's development impact, but this information is not sufficient to assess CDC's effect on poverty reduction and not enough is done to measure compliance with ethical investment principles. The level and nature of CDC executive remuneration are also relevant to business efficiency and management incentives. The Chief Executive's remuneration increased from £383,000 in 2003 to £970,000 in 2007, reflecting in part CDC's exceptional financial performance but pay arrangements place too much emphasis on financial performance and too little on success in reducing poverty.

Indian Business Case Studies Volume II Apr 16 2022 It has been decades since many business schools outside India adopted the case study methodology for teaching almost all branches of management studies. This trend has been seen in India, too, where top management institutes have implemented the case study-based methodology as an important pedagogical tool in business education. The major issue in India, however, is a severe shortage of Indian case studies through which business schools can provide industry insights

to students. This volume fills that gap. It has twenty Indian cases related to different aspects of business management. The cases cover some of the prominent disciplines of management like marketing, finance, human resource management, strategy management, operations management, accounting, and mergers and acquisitions. These cases best serve the purpose of adoption of 'case methodology' in classroom teaching or online lecture sessions for the faculty and students of business management.

LAW OF COPYRIGHT May 05 2021 The book attempts to critically analyse the cases on the law of copyright as well as statutory provisions of law of copyright. When the first edition of the book was published in 2015, there was no readable and dependable book for the general reader interested to be acquainted with the changing features of the law of copyright immediate after the enactment of the Copyright (Amendment) Act 2012. Since the publication of this book, the Finance Act 2017 has introduced Appellate Board in place of Copyright Board as well as the Supreme Court and High Courts in India have also delivered a large number of judicial decisions on the law of copyright. In this edition the author has surveyed all such Courts decisions and analysed them and inserted them in appropriate places of the book and also examined the impact of the Appellate Board. It presents not only the provisions of the Copyright Act 1957 in the form of a normative, but points out the changes made thereon by formal amendments as well as conflicts of law which have been settled by judicial interpretations. The book is divided into ten chapters. Chapter 1 is introductory, while Chapters 2 and 3 discuss the origin and development of law of copyright at international as well as

national level. The most important debatable issue in copyright law is "works in which copyright subsists", and the Chapter 4 is devoted to this aspect. Chapter 5 explores various issues relating to author of work, owner of copyright and recognised rights of copyright owner. The terms of copyright, licensing of copyright, international copyright and registration of copyright are the subject matter of Chapter 6, while rights of broadcasting organisation and of performers (neighbouring rights) are the subject matter of Chapter 7. Internet is the greatest communication medium of the contemporary era, and there is an inherent link between law of copyright and internet. Therefore, Chapter 8 is devoted to discuss various issues relating to "protection of copyright in internet." While Chapter 9 demonstrates the law relating to infringement of copyright and defences of copyright liability. Chapter 10, the concluding chapter, discusses the enforcement of copyright in India in detail. Though the book is designed for the undergraduate and postgraduate students of Law, it will be equally beneficial for the researchers, academicians, jurists, lawyers, judges as well as members of civil society. **TARGET AUDIENCE** " Undergraduate and postgraduate students of Law. " Researchers, Academicians, Jurists, Lawyers, Judges as well as members of Civil Society.

Doing Business 2008 Jun 18 2022 Regulations affecting 10 areas of everyday business are measured: starting a business, dealing with licenses, employing workers, registering property, getting credit, protecting investors, paying taxes, trading across borders, enforcing contracts, and closing a business. 'Doing Business 2008' updates all 10 sets of indicators, ranks countries on their overall ease of doing business, and analyzes reforms to business regulation - identifying which countries are

improving their business environment the most and which ones slipped. The indicators are used to analyze economic outcomes and identify what reforms have worked, where and why. 'Doing Business 2008' focuses on how complex business regulations dampen investment, growth and job creation in all businesses, and especially opportunities for women entrepreneurs.

The Field Guide to Counseling Toward Solutions Mar 15 2022
The Field Guide to Counseling Toward Solutions When it was first published in 1995, Linda Metcalf's book Counseling Toward Solutions became an instant bestseller. The book offered a new and positive program for changing individual behavior that helped K-12 students with their own problems and gave themselves-esteem in the process. Now, The Field Guide to Counseling Toward Solutions offers school counselors, teachers, and administrators a complete program for changing the way that schools deal with a variety of issues. From an alternative school program that enlists the power of teacher mentors to the elementary program that involves the teacher, parent, and student in the counseling process, this book shows how to make change happen and how to make it last. The solution-focused approach helps everyone involved to begin their own change process by noticing when a problem does not occur, rather than focusing on the problem or what caused it. It includes information targeted to specific age groups—elementary school students, middle schoolers, and adolescents—because each developmental stage requires a

certain perspective and focus in order to collaborate and reach solutions. The Field Guide to Counseling Toward Solutions offers guidelines for developing a school-wide program that encompasses virtually all of the day-to-day programming that schools must provide for students. The book includes techniques and suggestions for: Training staff to become more solution-focused and student-centered Working together with teams, teachers, and parents so that the "system" creates and maintains change Creating support groups for parents and students Reducing special education referrals through solution-focused conversations In this book, bestselling author and veteran school counselor Linda Metcalf offers more than a simple positive strategy or technique—she provides a way to think about school "clients" that can change interactions and guarantee success.
