**Motor City Barn Finds** Sep 20 2022 Detroit: Motor City... and the poster child for urban blight and dysfunction. This presented challenges and opportunities for Cotter, as he trolled the historic city looking for lost automobile gems. Here he tells the story of these "barn finds" and shares anecdotes of the cars and his journey.

**American Muscle Cars** Dec 11 2021 This is the muscle car history to own--a richly illustrated chronicle of America's greatest high-performance cars, told from their 1960s beginning through the present day! In the 1960s, three incendiary ingredients--developing V-8 engine technology, a culture consumed by the need for speed, and 75 million baby boomers entering the auto market--exploded in the form of the factory muscle car. The resulting vehicles, brutal machines unlike any the world had seen before or will ever see again, defined the sex, drugs, and rock 'n' roll generation. American Muscle Cars chronicles this tumultuous period

of American history through the primary tool Americans use to define themselves: their automobiles. From the street-racing hot rod culture that emerged following World War II through the new breed of muscle cars still emerging from Detroit today, this book brings to life the history of the American muscle car. When Pontiac's chief engineer, John Z. DeLorean, and his team bolted a big-inch engine into the division's intermediate chassis, they immediately invented the classic muscle car. In those 20 minutes it took Bill Collins and Russ Gee to bolt a 389 ci V-8 engine into a Tempest chassis they created the prototype for Pontiac's GTO--and changed the course of automotive history. From that moment on, American performance cars would never be the same. American Muscle Cars tells the story of the most desirable cars ever to come out of Detroit. It's a story of flat-out insanity told at full throttle and illustrated with beautiful photography.

**The Book of the Standard Motor Company** Nov 22 2022 Starting with the original Standard prototype of 1903, this book covers the scores of Standard models built until the brand was discontinued in 1963 (Britain) and 1987 (India). It also covers the Ferguson tractor involvement, military aero-engine manufacture, military aircraft manufacturer (including Beaufighter and Mosquito fighter-bombers), Rolls-Royce Avon turbo-jet military engine manufacture, and Triumph cars.

**Cadillac V-16s Lost and Found** Apr 15 2022 For eleven years prior to World War II, Cadillac defied the norms of practicality and produced an extravagant supercar, a 16-cylinder luxury automobile that could be tailored to the customer's every want. Big, thirsty and lavish, it cemented Cadillac's place in the top tier of motoring magnificence. Each of the cars has its own colorful and fascinating story to tell. Driven by a life-long love of the V-16 and an interest in the history of his own car, the author has assembled more than 65 of these tales, gleaned from interviews, books, periodicals and documents, into a liberally illustrated book. Each story is shaped by the people a particular car touched, and the events they lived through together. All are an

important part of our automotive and cultural history.
