Acquiring, Adapting and Developing Technologies Feb 13 2022 Economic progress requires technological development, which in turn depends on a country's social capacity to acquire, assimilate, and develop new technologies. Focusing on the evolution of Japan's economy from the Meiji Restoration to the present day, this volume provides an authoritative account, firmly grounded in theoretical and empirical analysis, of the country's attempts to generate the necessary social capacity for technological innovation and absorption. Successive chapters address the specific experiences of a number of key Japanese industries during this process. Each industrial case study is written by an acknowledged expert in the field and presents material of significant interest to specialists in economic development in a form that is also accessible to the nonspecialist. The book concludes with a summary of useful lessons, variously applicable to countries at all the different stages of industrialization.

The Big Book of Ford Tractors Dec 23 2022 This encyclopedia provides the most detailed and complete account ever given of Ford tractors, from the earliest Fordsons to the Ford-Fergusons, the Ford N Series, and the Ford "world" tractors manufactured into the 1970s. Amply illustrated, the book also offers extensive information on the numerous options and accessories, implements and variations that came out of Dearborn, Sherman Bros., and the great Funk Bros. hotrod conversions that could make each of these popular machines utterly unique. Written and compiled by the chief engineer of the Ford N Series tractors and the world's best-known Ford tractor historian, this encyclopedia is the ultimate one-stop resource for anyone with an

interest in Ford tractors.
