Rebecca Rusch is one of the great endurance athletes of our time. Known today as the Queen of Pain for her perseverance as a relentlessly fast runner, paddler, and mountain bike racer, Rusch was a normal kid from Chicago who abandoned a predictable life for one of adventure. In her new book *Rusch to Glory: Adventure, Risk & Triumph on the Path Less Traveled*, Rusch weaves her fascinating life's story among the exotic locales and extreme conditions that forged an extraordinary athlete from ordinary roots. Rusch has run the gauntlet of endurance sports over her career as a professional athlete--climbing, adventure racing, whitewater rafting, cross-country skiing, and mountain biking--racking up world championships along the way. But while she might seem like just another superhuman playing out a fistful of aces, her empowering story proves that anyone can rise above self-doubt and find their true potential. First turning heads with her rock climbing and paddling skills, Rusch soon found herself spearheading adventure racing teams like Mark Burnett's Eco-Challenge series. As she fought her way through the jungles of Borneo, raced camels across Morocco, threaded the rugged Tian Shan mountains, and river-boarded the Grand Canyon in the dead of winter, she was forced to stare down her own demons. Through it all, Rusch continually redefined her limits, pushing deep into the pain cave and emerging ready for the next great challenge. At age 38, Rusch faced a tough decision: retire or reinvent herself yet again. Determined to go for

broke, she shifted her focus to endurance mountain bike racing and rode straight into the record books at a moment when most athletes walk away. Rusch to Glory is more than an epic story of adventure; it is a testament to the rewards of hard work, determination, and resilience on the long road to personal and professional triumph.

Neurobiology of Monotremes brings together current information on the development, structure, function and behavioural ecology of the monotremes. The monotremes are an unusual and evolutionarily important group of mammals showing striking behavioural and physiological adaptations to their niches. They are the only mammals exhibiting electroreception (in the trigeminal sensory pathways) and the echidna shows distinctive olfactory specialisations. The authors aim to close the current gap in knowledge between the genes and developmental biology of monotremes on the one hand, and the adult structure, function and ecology of monotremes on the other. They explore how the sequence 'embryonic structure > adult structure > behaviour' is achieved in monotremes and how this differs from other mammals. The work also combines a detailed review of the neurobiology of monotremes with photographic and diagrammatic atlases of the sectioned adult brains and peripheral nervous system of the short-beaked echidna and platypus. Pairing of a detailed review of the field with the first published brain atlases of two of the three living monotremes will allow the reader to immediately relate key points in the text to features in the atlases and will extend a universal system of brain nomenclature developed in eutherian brain atlases by G Paxinos and colleagues to monotremes.

Get the basics of Cisco technology--hardware, internetworking fundamentals, and protocols. This book introduces the reader to the full breadth of Cisco's offerings, providing a solid foundation for continued study. Blueprints and sample configurations are included. This book covers two applications of ontologies in software engineering and software technology: sharing knowledge of the problem domain and using a common terminology among all stakeholders; and filtering the knowledge when defining models and metamodels. By presenting the advanced use of ontologies in software research and software projects, this book is of benefit to software engineering researchers in both academia and industry. This much-needed reference equips electrical engineers, designers, and researchers in the microwave industry with comprehensive, up-to-date information on the theoretical principles and practical applications of dielectric integrated guides and circuits. Discusses common anxieties and outlines several tools and techniques for dealing with phobias, anxieties, and panic attacks. Exam 70-431, SQL Server 2005 Implementation and Maintenance. The Microsoft Official Academic Course (MOAC) courses mapping to the Microsoft Certified Technology Specialist (MCTS) 70-431 certification exam. The MOAC IT Professional series is the Official from Microsoft, turn-key Workforce training program that leads to professional certification and was authored for college instructors and college students. MOAC gets instructors ready to teach and students ready for work by delivering essential resources in 5 key areas: Instructor readiness, student software, student assessment, instruction resources, and learning validation. With the Microsoft Official Academic course program, you are getting instructional support from Microsoft; materials that are accurate and make course delivery easy. Request your sample materials today. This comprehensive reference guide offers useful pointers for advanced use of SQL and describes the bugs and workarounds involved in compiling MySQL for every system. This book provides methods, guidelines and examples to guide researchers and students through a research project, and reviewing a considerable body of previous work. It contains a complete link analysis methodology for information science and social science research. Case studies include academic, business and commercial search engine applications. He's all business all the time. Now he's suddenly a dad. Fiddle player Eliza Bancroft had to improvise after an unplanned pregnancy four years ago. Instead of pursuing her dream of performing live music, she changed keys and has focused on being a good mom and a sought-after studio musician in Nashville. Her rhythm is set until she spots her son's father in a local magazine and realizes the man she was unable to track down lives right under her nose in Music City. As head of the family and CEO of North Brothers Sports, Mason North doesn't have time for play. His life mission is to build the family business—his father's legacy—so it can thrive for years to come. When the company's future becomes endangered, he mounts a full-scale assault to protect what matters the most. Then an unforgettable woman from his past lays a four-year-old truth bomb on him that blows up his priorities. Though they come from different

worlds, the attraction from before still hums between Eliza and Mason. But Mason has spent a lifetime entrenched solely in business, and Eliza has two hearts to protect. Can he embrace a more harmonious approach and give them a second chance at love? True Harmony is the fourth stand-alone book in the North Brothers series and includes a steamy second-chance romance for a workaholic CEO and a single-mom fiddle player, an overzealous dog named Blitz, and a three-year-old in need of a dad. Submerge yourself into the North Brothers' world now! If you enjoy books by Jill Shalvis, Zoe York, BJ Harvey, Piper Rayne, Molly McAdams, Lori Wilde, Melissa Foster, Bella Andre, Claudia Burgoa, Alexa Rivers, JH Croix, Christine DePettrillo, Melissa Chambers, or Amanda Torrey, chances are, you'll love Amy Knupp's Island Fire series. \*\*\*\*\* second chance romance, CEO, secret baby, accidental pregnancy, one-night stand, wealthy hero, opposites attract, single mom, kid in need of a father

These accessible commentaries are for anyone who wants to enter a serious study of God's Word. Each volume helps the reader think through the literary and theological issues in the text and provides correlation to multiple numbering systems for word study. It is an excellent resource for teachers, Bible study leaders, pastors, and growing Christians. Includes the entire NLT text of Romans and Galatians, translation notes, and fresh expository commentary. Dr. Roger Mohrlang has earned a BS from Carnegie Institute of Technology, an MA from Fuller Theological Seminary, and the D.Phil. in New Testament from University of Oxford. He served as a Bible translator and translation consultant in Africa for over 7 years, has served as a visiting professor at various colleges, and is currently Professor of Biblical Studies at Whitworth College, where he has been since 1988. His areas of expertise include Paul's letters and New Testament ethics. Dr. Gerald Borchert is retired professor of New Testament from both Southern Baptist Theological Seminary and Northern Baptist Theological Seminary. He is currently Thesis Director at Institute for Worship Studies, Jacksonville, Florida, and part-time Professor of New Testament at Carson Newman College. He earned his B.A. from the University of Alberta, an LL.B., from University of Alberta Law School, an M.Div. from Eastern Baptist Theological Seminary, his Th.M. at Princeton Theological Seminary and his Ph.D. from Princeton Theological Seminary and Princeton University (1967). He has also done post-doctoral work at numerous schools and has served as a pastor and interim pastor variously throughout his career.

Although the function of nitric oxide in a regulatory capacity in the central and peripheral nervous system is widely recognized, the full scope of its actions and its interrelationships with other classes of regulatory molecules is just beginning to be comprehended. This volume contains a number of sophisticated and advanced methods essential for exploring the activity of nitric oxide in the brain. It will be a valuable tool for

the established investigator and for those just entering the field. Comprehensive protocols included for detection of NO and related compounds by chemical, immunohistochemical, and in situ hybridization techniques Newly developed methods for the purification of neuronal and endothelial NO synthase, production of monoclonal antibodies to NO synthase, molecular cloning and expression of NO synthesis, and control of NO synthase gene expression Assessment of NO-mediated functions in neurons, central nervous system, cerebral circulation, synaptic transmission, and vascular tone Calcium imaging by confocal microscopy, evaluation of the effect of NO on iron metabolism, and detection of heme oxygenase-1 and -2 message level and distribution Makin' a list, and rocking it...twice. MAKE MINE A MENAGE, BOOK 1 Perpetual good girl Lacey McGuire has two Christmas wish lists. One suitable for public consumption...and a private one that's too hot to handle. Right at the top: wild, wicked fantasies about her best buddies and business partners Ryan Hollister and Bram Colton. Besides the fact they're both poster boys for Hunks 'R' Us, they've been there for her through thick, thin and the heartbreak of a cheating fiancé. So what if her boys will never know they star in her sexiest daydreams? In her fantasy world, her heart will never get trampled again. Ry and Bram are pretty sure Lacey never meant to email a list of some of her raunchiest wants. Particularly the one that tightens their shorts-she wants a threesome. With them. Although they've loved her for years, they made a pact to keep Lacey off limits in order to protect their friendship. Now all bets are off. And the quest to give her all she wants-and more-is on. When someone is diagnosed with obsessive-compulsive disorder (OCD), chances are they've been living with the symptoms for a long time. People with OCD may have long felt embarrassed by their thoughts and behaviors, which may include fear of contamination, the need for symmetry, pathological doubt, aggressive thoughts, repeating behaviors, and obsessive cleaning. OCD: A Guide for the Newly Diagnosed helps readers understand how OCD works so they can develop better strategies for coping with their symptoms. This pocket guide offers guidance for coping with the diagnosis itself, discusses stigmas related to OCD, and includes help for readers unsure of who they should tell about the diagnosis. Readers also learn about the most effective treatment approaches and easy ways to begin to manage their OCD symptoms. An OCD diagnosis can be a devastating event, or it can be a catalyst for positive change. Books in the Guides for the Newly Diagnosed series provide readers with all the tools they need to process a diagnosis in the healthiest way possible, and then move forward to manage their symptoms so that the disorder doesn't get in the way of living a fulfilling life. This book has been awarded The Association for Behavioral and Cognitive Therapies Self-Help Seal of Merit – an award bestowed on outstanding self-help books that are consistent with cognitive behavioral therapy (CBT) principles

and that incorporate scientifically tested strategies for overcoming mental health difficulties. Used alone or in conjunction with therapy, our books offer powerful tools readers can use to jump-start changes in their lives. This book is a part of New Harbinger Publications' Guides for the Newly Diagnosed series. The series was created to help people who have recently been diagnosed with a mental health condition. Our goal is to offer user-friendly resources that provide answers to common questions readers may have after receiving a diagnosis, as well as evidence-based strategies to help them cope with and manage their condition, so that they can get back to living a more balanced life. Visit [www.newharbinger.com](http://www.newharbinger.com) for more books in this series. Neurobiology of Addiction highlights some of the most promising research areas of the rapidly expanding field of addiction. It will be useful as a practical tool for clinicians, research investigators, and trainees-both in addiction and in other illnesses with overlapping mechanisms-as well as an informative resource for non-technical readers who are interested in addiction or mental health policy. The editors have combined their areas of expertise to provide a unique perspective into the prevention and treatment of addictive disorders. Their approach addresses addiction in the broader context of behavioral processes and survival-related adaptations, focusing on its neurobiological precursors and drawing parallels between addictions and other recurrent or progressive psychiatric disorders. The book also emphasizes resilience, clinical contexts of addictive behavior, and treatment strategies that target its underlying neurobiological mechanisms. Learn how to deal with the peculiar problems of traditional bargaining through proven models and techniques that will help you to: Gain a better understanding of the dynamics of money negotiations, Identify the recurring problems presented in the negotiation of insured claims, Arm yourself with new tools to move beyond impasse, Build a model of the mediation process that assists when traditional bargaining is unavoidable, Help the parties in traditional bargaining in a facilitative, rather than a directive way. With a focus on key real-world capacities--independent living, vocational functioning, medication management, and driving--leading experts explore how individuals go about their daily lives, where and why disruptions occur, and potential opportunities for improving function. Strategies for direct assessment are reviewed, from standard neuropsychological tests to multimodal approaches and technology-based tools. Chapters also provide functional assessment guidance for specific neurological and psychiatric conditions: dementia, traumatic brain injury, depression, schizophrenia, and others. New to This Edition

- \*Incorporates over a decade of technological and methodological innovations.
- \*Chapter on theories and models of everyday functioning.
- \*Chapters on naturalistic assessment, wearable sensors, ambulatory assessment, and virtual-reality-based tools.
- \*Practical clinical implications are highlighted throughout.

Annotation This book fulfills the lack of a modern analysis of the history of igneous petrology and will be a significant contribution. The author is a well-known igneous petrologist who appreciates the extent to which many geological questions are still awaiting definitive answers. The papers in this volume provide coverage of topics including: dynamical response synthesis; vibroacoustics; finite element analysis; optimization and design; modelling of damage and fracture; geometric and material nonlinearity; and system identification and parameter estimation.
