This book puts forward an institutional explanation of the recent dynamics of foreign direct investment (FDI) in China. It argues that the concentration of FDI in the Chinese manufacturing economy since the beginning of this century is largely the result of China's entrepreneurial urban growth strategy, which was in turn motivated by the overall political and fiscal structures of China and was facilitated by urban land use under the manipulation of municipalities. By identifying the interactions between cross-border capital flow, national regulations and local responses, this book not only provides a fresh understanding of China's FDI pattern from an urban perspective that has been rare among publications on similar topics, but also sheds light on the drivers underlying China's rapid economic growth and its implications for sustainable development. It also stands as a useful reference for other countries and regions that plan to launch their own state-led development projects. Six months after its American introduction in 1985, the Yugo was a punch line; within a year, it was a staple of late-night comedy. By 2000, NPR's Car Talk declared it "the worst car of the millennium." And for most Americans that's where the story begins and ends. Hardly. The short, unhappy life of the car, the men who built it, the men who imported it, and the decade that embraced and discarded it is rollicking and astounding, and one of the greatest untold business-cum-morality tales of the 1980s. Mix one rabid entrepreneur, several thousand "good" communists, a willing U.S. State Department, the shortsighted Detroit auto industry, and improvident bankers, shake vigorously, and you've got The Yugo: The Rise and

Fall of the Worst Car in History. Brilliantly re-creating the amazing confluence of events that produced the Yugo, Yugoslav expert Jason Vuic uproariously tells the story of the car that became an international joke: The American CEO who happens upon a Yugo right when his company needs to find a new import or go under. A State Department eager to aid Yugoslavia's nonaligned communist government. Zastava Automobiles, which overhauls its factory to produce an American-ready Yugo in six months. And a hole left by Detroit in the cheap subcompact market that creates a race to the bottom that leaves the Yugo . . . at the bottom.
